# A CLOUD STORY

The journey of a large Australian Bank in migrating workload to Oracle Cloud

IN THREE MONTHS,

500 VMS

servers discovered, sanitized and recreated in OCI with security profiles, network rules and SSOE configurations across 35 environment groups
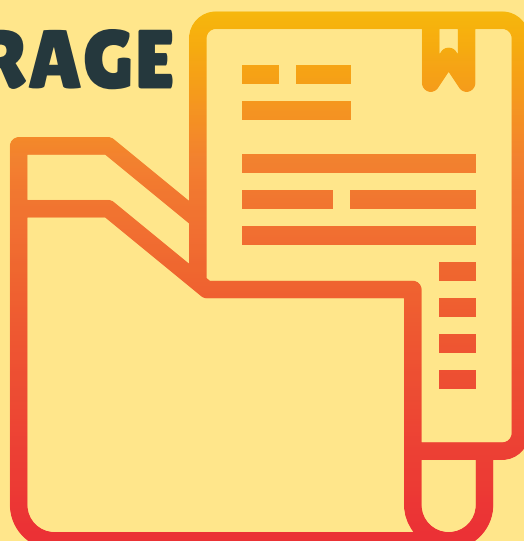

DATABASES 175

fully managed Oracle databases hosting over 400 applications, auto-tuned and maintained

110 TB STORAGE

Over 110Tera Bytes of high performance storage used per month to provide optimum disk IOPS
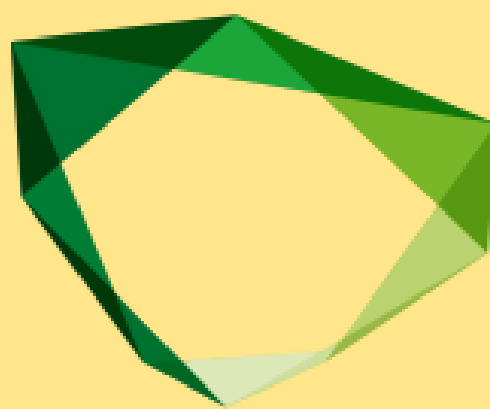

400 APPLICATIONS

wide range of applications - banking, SOA, security, integration, data ingestion & content management

4 HRS AUTOMATED BUILDS

Average time to deploy end-to-end. Fully automated deployments including VMs, databases, applications and code. Powered by MintPress

230K EVENTS MONITORED

Powered by Prometheus & Grafana, over 230k events are monitored and reported on. All targets are self registered on build requiring no human intervention

300 DEVELOPERS

platform serves over 300 developers and administrators to continuously develop, deploy and test
